PARENTOLOGY

EVERYTHING YOU WANTED TO KNOW ABOUT THE SCIENCE OF RAISING CHILDREN BUT WERE TOO EXHAUSTED TO ASK

[Simon and Schuster](#) An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant,

jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

THE FEMALE BRAIN

Random House Accessible, fun and compelling, and based on more than three decades of research, *The Female Brain* will help women to better understand themselves - and the men in their lives. In this groundbreaking book, Dr Louann Brizendine describes the uniquely flexible structure of the female brain and its constant, dynamic state of change - the key difference that separates it from that of the male - and reveals how women think, what they value, how they communicate, and whom they'll love. She also reveals the neurological explanations behind why... - A woman remembers fights that a man insists never happened... - Thoughts about sex enter a woman's brain perhaps once every couple of days, but may enter a man's brain up to once every minute... - A woman's brain goes on high alert during pregnancy - and stays that way long after giving birth... - A woman over 50 is more likely to initiate divorce than a man... - Women tend to know what people are feeling, while men can't spot an emotion unless someone cries or threatens them with bodily harm!

FAST FOOD NATION

THE DARK SIDE OF THE ALL-AMERICAN MEAL

Houghton Mifflin Harcourt Explores the homogenization of American culture and the impact of the fast food industry on modern-day health, economy, politics, popular culture, entertainment, and food production.

BRANDS AND BRANDING

John Wiley & Sons **With contributions from leading brand experts around the world, this valuable resource delineates the case for brands (financial value, social value, etc.) and looks at what makes certain brands great. It covers best practices in branding and also looks at the future of brands in the age of globalization. Although the balance sheet may not even put a value on it, a company's brand or its portfolio of brands is its most valuable asset. For well-known companies it has been calculated that the brand can account for as much as 80 percent of their market value. This book argues that because of this and because of the power of not-for-profit brands like the Red Cross or Oxfam, all organisations should make the brand their central organising principle, guiding every decision and every action. As well as making the case for brands and examining the argument of the anti-globalisation movement that brands are bullies which do harm, this second edition of Brands and Branding provides an expert review of best practice in branding, covering everything from brand positioning to brand protection, visual and verbal identity and brand communications. Lastly, the third part of the book looks at trends in branding, branding in Asia, especially in China and India, brands in a digital world and the future for brands. Written by 19 experts in the field, Brands and Branding sets out to provide a better understanding of the role and importance of brands, as well as a wealth of insights into how one builds and sustains a successful brand.**

AGRO-INDUSTRIES FOR DEVELOPMENT

CABI **The development of competitive agro-industries is crucial for creating employment and income opportunities as well as enhancing the quality of and demand for farm products. Agro-industries can have a real effect on international development by increasing economic growth and reducing poverty in both rural and urban areas of developing countries. However, in order to avoid adverse effects to vulnerable countries and people, sound policies and strategies for fostering agro-industries are needed. Agro-Industries for Development highlights the current status and future course for agro-industries and brings attention to the contributions this sector can make to international development. The book includes contributions from agro-industry specialists, academic experts and UN technical agencies, chapters address the strategies and actions required for improving agro-industrial competitiveness in ways that can create income, generate employment and fight poverty in the developing world. This book is a co-publication with FAO and UNIDO.**

HUMANIZING DIGITAL REALITY

DESIGN MODELLING SYMPOSIUM PARIS 2017

Springer This book aims at finding some answers to the questions: What is the influence of humans in controlling CAD and how much is human in control of its surroundings? How far does our reach as humans really go? Do the complex algorithms that we use for city planning nowadays live up to their expectations and do they offer enough quality? How much data do we have and can we control? Are today's inventions reversing the humanly controlled algorithms into a space where humans are controlled by the algorithms? Are processing power, robots for the digital environment and construction in particular not only there to rediscover what we already knew and know or do they really bring us further into the fields of constructing and architecture? The chapter authors were invited speakers at the 6th Symposium "Design Modelling Symposium: Humanizing Digital Reality", which took place in Ensa-Versailles, France from 16 - 20 September 2017.

Our air-cooled Volkswagen manuals provide both do-it-yourself owners and professional mechanics with clear explanations and illustrations, detailed service steps, and time-saving troubleshooting tips.

THE CURSE OF LONO

Taschen America Llc A wild ride to the dark side of Americana. Hunter S. Thompson's and Ralph Steadman's most eccentric book **The Curse of Lono** is to Hawaii what **Fear and Loathing** was to Las Vegas: the crazy tales of a journalist's "coverage" of a news event that ends up being a wild ride to the dark side of Americana. Originally published in 1983, **The Curse of Lono** features all of the zany, hallucinogenic wordplay and feral artwork for which the Hunter S. Thompson/Ralph Steadmanduo became known and loved. This curious book, considered an oddity among Hunter's oeuvre, was long out of print, prompting collectors to search high and low for an original copy. TASCHEN's signed, limited edition sold out before the book even hit the stores—this unlimited version, in a different, smaller format, makes **The Curse of Lono** accessible to everyone.
