Helping Children Cope with Loss and Change A Guide for Professionals and Parents *Routledge* Whether it's the grief of bereavement, the strain of divorce or the uncertainty of a new home or school, loss and change affect children in countless ways. Nevertheless, teachers and parents frequently find themselves ill-equipped to help children struggling with the difficult feelings that these situations, and others like them, bring. **Helping Children Cope with Loss and Change** offers guided support for teachers, health professionals and parents. Designed for use with children aged 4-10, this guide offers: Case studies illustrating various signs of grief and loss, to help the caregiver spot and manage a child's pain. Therapeutic stories designed to be read with the child, and with prompt questions to encourage discussion. Creative activities and exercises that can be developed into a therapeutic 'toolkit' to support the child and the caregiver themselves. With chapters that move from Loss and Change to Resolution and Resilience, addressing the needs of both the child and caregiver, **Helping Children Cope with Loss and Change** will be an invaluable therapeutic tool. **The Helping Professional's Guide to Ethics Theory in Practice** *Oxford University Press* **The Helping Professional's Guide to Ethics, Second Edition** develops a comprehensive framework for ethics based on Bernard Gert's theory of common morality. Part I of the text introduces basic moral theory, provides an overview to moral development, and introduces the common morality framework. Part II focuses on common

ethical issues faced by helping professionals such as: confidentiality, competency, paternalism, informed consent, and dual relationships. Each chapter provides an overview of each concept and their ethical relevance for practice. Throughout the text, students put their critical thinking skills into practice to promote deep learning. Children and Trauma A Guide for Parents and Professionals *Jossey-Bass* Childhood traumas range widely in their severity and impact. A car accident, an earthquake or flood, being attacked by a dog, undergoing a frightening medical treatment?all are distinctly different events yet all provoke common symptoms of psychological trauma. These symptoms may include fearfulness, nightmares, and dramatic behavioral or personality changes. And parental anxiety over changes in a child can, in turn, complicate the healing process. **Children and Trauma** teaches parents and professionals about the effects of such ordeals on children and offers a blueprint for restoring a child's sense of safety and balance.

Cynthia Monahon, a child psychologist who specializes in the treatment of psychological trauma, offers hope and reassurance for parents. She suggests straightforward ways to help kids through tough times, and also describes in detail the warning signs that indicate a child needs professional help. Monahon helps adults understand psychological trauma from a child's point of view and explores the ways both parents and professionals can help children heal.

Helping School Refusing Children and Their Parents A Guide for School-based Professionals Children who miss substantial amounts of school pose one of the most vexing problems for school officials. In many cases, school personnel must assess these students and successfully help them to return to the academic setting. This can be difficult considering most school-based professionals are pressed for time and do not have access to proper resources. The information in this book

can help school officials combat absenteeism and reduce overall dropout rates. Designed for guidance counselors, teachers, principals and deans, school psychologists, school-based social workers, and other school professionals, this book outlines various strategies for helping children get back to school with less distress that can easily be implemented in schools. The book describes four clinical interventions that can be used to effectively address moderate cases of absenteeism, as well as instructions for adapting these procedures for use within the school system. A chapter on assessment describes several methods for identifying school refusal behavior, including time-limited techniques for school officials who have little opportunity to conduct detailed evaluations. Worksheets for facilitating assessment are included and can easily be photocopied from the book. Other chapters provide advice for working collaboratively with parents, preventing relapse, and tackling special issues such as children with anxiety, children who take medication, and children who are victims of bullying. Topics such as poverty, homelessness, teenage pregnancy, violence, and school safety are also addressed.
