The Elements of Subtitles, Revised and Expanded Edition: A Practical Guide to the Art of Dialogue, Character, Context, Tone and Style in Subtitling

Lulu.com Good subtitles don't just transfer words from one language to another. They are as funny, scary, witty and compelling as the original. The Elements of Subtitles is a practical guide on how to get subtitling right. Translators working from any language into English will learn how to write vibrant dialogue, develop character profiles, find dramatic and comic equivalents, use dialect and slang, avoid common mistakes and understand tone, style and context in film. Filled with examples from screenplays across the globe, this is an indispensable reference on the nuts and bolts of creating accurate and exciting subtitles. Since its publication, The Elements of Subtitles has become a primary resource for film translation. Fully updated in a revised and expanded edition, "The Elements of

Subtitles is a must for anyone who wants to get into the world of translation," (Midwest Book Review) and "The definitive guide for all working subtitle translators." (Tom Larsen, YA Entertainment)

Prostate Cancer

Demos Medical Publishing A Doody's Core Title 2012 Emerging Cancer Therapeutics is a trinary, hard cover, periodical that is designed to provide an up-to-date evidence-based review of a dedicated emerging cancer therapy topic of interest to clinicians and scientists who are involved in the care of patients receiving cancer treatment. It will serve as both a reference and instructional tool for students, housestaff, fellows, practicing clinical oncologists, radiation oncologists, surgical oncologists, cancer biologists, and interdisciplinary colleagues throughout the oncology spectrum. With contributions from experts across the United States and Canada, Prostate Cancer details the current management of prostate cancer and reviews new therapies in development for prostate cancer, with an emphasis on castration-resistant prostate cancer (CRPC). Coverage includes discussion of multiple new agents that have been shown to impact overall survival or improve skeletal-related events in metastatic CRPC as well as articles covering new data on screening and prevention, integration of surgery and radiation with newly emerging medical therapies, and coverage of the newest developments in immunotherapy. This book is a valuable tool for clinicians, nurses, researchers, medical students, residents, and fellows. Included in Prostate Cancer: Updates in Prostate Cancer Prevention Prostate Cancer Screening, 2011 Current Surgical Approaches to Primary Prostate Cancer Treatment Updates in Radiation Therapy for Prostate Cancer: Dose Matters An Update on Androgen-Deprivation Therapy for Advanced Prostate Cancer Novel Androgen Receptor Therapeutic Targets for Advanced Prostate Cancer New Understanding of Metabolic Complications of Androgen-Deprivation Therapy Current State of Docetaxel-Based Therapy in Castration-Resistant Prostate Cancer Second-Line Chemotherapy for Castration-Resistant Prostate Cancer Emerging Role of Immunotherapy in the Treatment of Prostate Cancer Novel Bone-Targeted Therapy in Metastatic Prostate Cancer Emerging Treatment Strategies for Metastatic Prostate Cancer: The Next Step Forward

Translating Film Subtitles into Chinese

A Multimodal Study

Springer *This book examines three metafunction meanings in subtitle translation with three research foci, i.e., the main types of cross-modal interrelation, the primary function of semiotic interplay, and the key linguistic components influencing the subtitles. It goes beyond traditional textual analysis in translation studies; approaches subtitle translation from a multimodality standpoint; and breaks through the linguistic restraints on subtitling research by underscoring the role of semiotic interplay. In the field of multimodality, this book bridges subtitling and multimodality by investigating the interweaving relationships between different semiotic modes, and their corresponding impacts on subtitle translation.*

Descriptive Translation Studies – and beyond

Revised edition

John Benjamins Publishing *This is an expanded and slightly revised version of the book of the same title which caused quite a stir when it was first published (1995). It thus reflects an additional step in an ongoing research project which was launched in the 1970s. The main objective is to transcend the limitations of using descriptive methods as a mere ancillary tool and place a proper branch of DTS at the very heart of the discipline, between the theoretical and the applied branches. Throughout the book, theoretical and methodological discussions are illustrated by an assortment of case studies, the emphasis being on the need to take whatever one wishes to focus on within the contexts which are relevant to it. Part One discusses the pivotal position of the descriptive branch within Translation Studies, and Part Two then outlines a detailed rationale for that positioning. This, in turn, supplies a framework for the case studies comprising Part Three, where a number of exemplary issues are analysed and contextualized: texts and modes of translational behaviour are situated in their cultural setting, and textual components are related to their texts and then also to the cultural constellations in which they are embedded. All this leads to Part Four, which asks what the knowledge accumulated through descriptive studies of the kind advocated in the book is likely to yield in terms of both the theoretical and the applied branches of the field. All in all: an innovative, thought-provoking book which no one with a keen interest in translation can afford to ignore.*

Descriptive Translation Studies and Beyond

John Benjamins Publishing A replacement of the author's well-known book on Translation Theory, *In Search of a Theory of Translation* (1980), this book makes a case for Descriptive Translation Studies as a scholarly activity as well as a branch of the discipline, having immediate consequences for issues of both a theoretical and applied nature. Methodological discussions are complemented by an assortment of case studies of various scopes and levels, with emphasis on the need to contextualize whatever one sets out to focus on. Part One deals with the position of descriptive studies within TS and justifies the author's choice to devote a whole book to the subject. Part Two gives a detailed rationale for descriptive studies in translation and serves as a framework for the case studies comprising Part Three. Concrete descriptive issues are here tackled within ever growing contexts of a higher level: texts and modes of translational behaviour □ in the appropriate cultural setup; textual components □ in texts, and through these texts, in cultural constellations. Part Four asks the question: What is knowledge accumulated through descriptive studies performed within one and the same framework likely to yield in terms of theory and practice? This is an excellent book for higher-level translation courses.

Socrates and Subtitles

A Philosopher's Guide to 95 Thought-Provoking Movies from Around the World

McFarland A sequel to the author's earlier work *Plato and Popcorn: A Philosopher's Guide to 75 Thought-Provoking Movies*, this book presents analyses of 95 movies from the Americas and 20 other countries. Each entry includes a brief introduction to the film along with a list of philosophical questions to ponder after viewing it. Most entries also include a list of additional recommended films. The films cover a wide range of genres and topics—from the haunting tale of doomed Polish freedom fighters in *Kanal's World War II Warsaw* to the romantic and passionate story of rekindled love in *Australia's Innocence*. Instructors considering this book for use in a course may request an examination copy [here](#).

Listening to Subtitles

Subtitles for the Deaf and Hard of Hearing

Peter Lang This book is the first monographic study on subtitles for the deaf and hard of hearing from a multidisciplinary perspective, from engineering to philology. The book departs from studies, analyses, tests, validations, resulting data, and their application from the nation-wide research on accessibility and usability of subtitles carried out in Spain. Tests and further analysis were carried out paying attention to users' hearing profiles, the many formal features of subtitles - size, font, colour, position, etc. -, and the syntax of the subtitle. The book also contains articles which discuss present and future research on subtitles for the deaf and hard of hearing carried out in Canada and across Europe: Belgium, Denmark, Italy, Poland, Spain, and UK. It provides an outlook for the implementation of the European Guidelines on Media Accessibility.

Teaching in Multilingual Classrooms

A Teacher's Guide to Context, Process, and Content

Prentice Hall Comprehensive -- yet not overwhelming -- this book provides a basic framework for teaching in classroom settings that are multilingual and multicultural. Written specifically from an educational perspective and using a balance of contemporary theory, research, and practice, it explores different dimensions of context, process, and content -- as well as assessment and evaluation -- related to pedagogy that empowers language minority students. It is accessible and appropriate for teachers with little or no background in ESL or bilingual education as well as for specialists. Captures a teacher's vision of the concepts and strategies that make a difference for language minority students. Synthesizes contemporary scholarship complemented by strategies and techniques that teachers can readily apply in K-12 classrooms. This book reveals the complexity of the cultural and linguistic influences on teaching and learning processes -- and helps teachers conceptualize the interrelationships involved in relation to dimensions common to all classroom settings. It addresses the needs of all teachers -- elementary and secondary, beginning and experienced, prospective specialists and non-specialists, those in urban, suburban, and rural settings. It explores classrooms that are multilingual and multicultural from a tripartite perspective. It describes multilingual classrooms and explains why a focus on context, process, and content is central to providing instructional programs that empower language minority students.

Research Methods in Sign Language Studies

A Practical Guide

John Wiley & Sons Research Methods in Sign Language Studies is a landmark work on sign language research, which spans the fields of linguistics, experimental and developmental psychology, brain research, and language assessment. It summarizes all relevant methodologies in sign language research and provides a detailed synopsis of how to do necessary research. In 20 chapters, it examines a broad range of topics, including ethical and political issues, key methodologies, and the collection of linguistic, cognitive, neuroscientific, and neuropsychological data. Each chapter is written by a top researcher on the subject and provides tips and recommendations to improve research quality at all levels. The book is innovative and contemporary in tone and ideology. It

encourages readers to approach sign languages from the perspective of diversity rather than disability and is the first volume to bring together work focusing on methodology from both hearing and deaf researchers in sign language studies. Integrating research on sign languages from Europe, Asia, North and South America, and Africa, this is an essential reference for any student or researcher who requires the most comprehensive and up-to-date information in the field.

Research Methods for Librarians and Educators: Practical Applications in Formal and Informal Learning Environments

ABC-CLIO Using an innovative, real-world approach that makes the research problem and method relevant and valuable to the reader, this book provides a broad overview of research methods used in library and information studies and associated fields. • Explains the complex topic of research methodology and statistics in simple, straightforward language • Provides examples that help clarify key concepts and points and answer potential questions • Supplies guidance with practical applications, allowing readers to see how research methods may be applied to specific situations

Boosting Executive Skills in the Classroom A Practical Guide for Educators

John Wiley & Sons A guide for helping students with weak Executive Function skills to learn efficiently and effectively Students with weak Executive Function skills need strong support and specific strategies to help them learn in an efficient manner, demonstrate what they know, and manage the daily demands of school. This book shows teachers how to do exactly that, while also managing the ebb and flow of their broader classroom needs. From the author of the bestselling parenting book Late, Lost, and Unprepared, comes a compilation of the most practical tools and strategies, designed to be equally useful for children with EF problems as well as all other students in the general education classroom. Rooted in solid research and classroom-tested experience, the book is organized to help teachers negotiate the very fluid challenges they face every day; educators will find strategies that improve their classroom "flow" and

reduce the stress of struggling to teach students with EF weaknesses. Includes proven strategies for teachers who must address the needs of students with Executive Function deficits Contains information from noted experts Joyce Cooper-Kahn, a child psychologist and Margaret Foster, an educator and learning specialist Offers ways to extend learning and support strategies beyond the classroom The book's reproducible forms and handouts are available for free download This important book offers teachers specific strategies to help students with EF deficits learn in an efficient manner, demonstrate what they know, and manage the daily demands of school.

Resources in Education

Subtitling Today

Shapes and Their Meanings

Cambridge Scholars Publishing Nowadays subtitling accomplishes several purposes; it is meant for diverse audiences and comes in many forms. This collection of innovative contributions explores these different manifestations, and offers a snapshot of the state of the art of a dynamic and ever-evolving field of study. This volume intentionally assembles essays that analyse subtitling in various audiovisual genres, including television series, variety programmes, operas, operettas, feature films and live conferences, and that consider various languages, such as Chinese, English, Finnish, French, Italian, Japanese and Polish. It underscores both traditional and novel viewpoints and approaches to the subject, thus broadening the horizons of such a fascinating field. The diversity of topics tackled will encourage further reflection on a well-established research area, and, as such, the volume will appeal to both novice and expert researchers and professionals.

Biomedical Visualisation

Volume 7

Springer Nature This edited book explores the use of technology to enable us to visualise the life sciences in a more meaningful and engaging way. It will enable those interested in visualisation techniques to gain a better understanding of the applications that can be used in visualisation, imaging and analysis, education, engagement and training. The reader will be able to explore the utilisation of technologies from a number of fields to enable an engaging and meaningful visual representation of the biomedical sciences, with a focus in this volume related to anatomy, and clinically applied scenarios. All chapters in this volume feature collaborative and innovative postgraduate research projects from graduate students of the MSc Medical Visualisation and Human Anatomy. This pioneering, world-leading postgraduate taught degree program is a joint partnership degree between the School of Life Sciences within the College of Medical, Veterinary and Life Sciences in the University of Glasgow, and the School of Simulation and Visualisation, The Glasgow School of Art. These chapters truly showcase the amazing and diverse technological applications that have been carried out as part of their research projects.

Radiation Oncology

Difficult Cases and Practical Management

Demos Medical Publishing " Radiation Oncology provides residents, fellows, and clinicians with a practical, evidence-based guide to the current management of difficult cases in radiation oncology. Emphasis is on the management of those clinical challenges commonly seen in practice that the community practitioner would normally handle without outside referral. The book offers comparisons of treatment approaches to difficult situations, allowing the reader to compare their current treatment approach to that of experts and others in the community. Radiation Oncology is organized in seven sections corresponding to the major treatment areas of radiation oncology. Each section includes three cases to illustrate specific clinical challenges for which there is no clear treatment protocol. The case discussion includes an expert opinion on optimal management along with alternatives from a second academic expert's perspective and from a community practitioner's perspective. Radiation Oncology features: Evidence-based approach to difficult management challenges in radiation oncology Expert authors provide evidence assessment and management summaries through presentation of relevant cases Community practitioner reviewers ensure real-world relevance of each discussion Reviews the most relevant literature pertaining to the challenging scenarios clinicians encounter every day Management alternatives allow discussion of the full range of management options and specifics for difficult problems including hardline recommendations "

Handbook of Research on Driving STEM Learning With Educational Technologies

IGI Global Educational strategies have evolved over the years, due to research breakthroughs and the application of technology. By using the latest learning innovations, curriculum and instructional design can be enhanced and strengthened. The Handbook of Research on Driving STEM Learning With Educational Technologies is an authoritative reference source for the latest scholarly research on the implementation and use of different techniques of instruction in modern classroom settings. Featuring exhaustive coverage on a variety of topics including data literacy, student motivation, and computer-aided assessment, this resource is an essential reference publication ideally designed for academicians, researchers, and professionals seeking current research on

emerging uses of technology for STEM education.

Journal of Geoscience Education

Principles and Guidelines in Software User Interface Design

Pearson *A comprehensive sourcebook of practical guidelines for developing clear software user interfaces.*

The French Review

Communication in Healthcare Settings

Policy, Participation and New Technologies

John Wiley & Sons *This book presents an international snapshot of communication in healthcare settings and examines how policies, procedures and technological developments influence day to day practice. Brings together a series of papers describing features of healthcare interaction in settings in Australasia, the U.S.A, continental Europe and the UK Contains original research data from previously under-studied settings including professions allied to medicine, telephone-mediated interactions and secondary care*

Contributors draw on the established conversation analytic literature on healthcare interaction and broaden its scope by applying it to professionals other than doctors in primary care. Examines how issues relating to policy, procedure or technology are negotiated and managed throughout daily healthcare practice

Technology and Innovation in Learning, Teaching and Education

Second International Conference, TECH-EDU 2020, Vila Real, Portugal, December 2-4, 2020, Proceedings

Springer Nature This book constitutes the thoroughly refereed post-conference proceedings of the Second International Conference on Technology and Innovation in Learning, Teaching and Education, TECH-EDU 2020, held in Vila Real, Portugal, in December 2020. Due to the COVID-19 pandemic the conference was held in a fully virtual format. The 27 revised full papers along with 15 short papers presented were carefully reviewed and selected from 79 submissions. The papers are organized in topical sections on digital resources as epistemic tools to improve STEM learning; digital technologies to foster critical thinking and monitor self and co-regulation of e-learning; Covid-19 pandemic, changes in educational ecosystem and remote teaching; transforming teaching and learning through technology; educational proposals using technology to foster learning competences.

Subtitling Norms for Television

An Exploration Focussing on Extralinguistic Cultural

References

John Benjamins Publishing *In most subtitling countries, those lines at the bottom of the screen are the most read medium of all, for which reason they deserve all the academic attention they can get. This monograph represents a large-scale attempt to provide such attention, by exploring the norms of subtitling for television. It does so by empirically investigating a large corpus of television subtitles from Scandinavia, one of the bastions of subtitling, along with other European data. The aim of the book is twofold: first, to provide an advanced and comprehensive model for investigating translation problems in the form of Extralinguistic Cultural References (ECRs). Second, to empirically explore current European television subtitling norms, and to look into future developments in this area. This book will be of interest to anyone interested in gaining access to state-of-the-art tools for translation analysis, or in learning more about the norms of subtitling, based on empirically reliable and current material.*

Reception Studies and Audiovisual Translation

John Benjamins Publishing Company *The coming of age of audiovisual translation studies has brought about a much-needed surge of studies focusing on the audience, their comprehension, appreciation or rejection of what reaches them through the medium of translation. Although complex to perform, studies on the reception of translated audiovisual texts offer a uniquely thorough picture of the life and afterlife of these texts. This volume provides a detailed and comprehensive overview of reception studies related to audiovisual translation and accessibility, from a diachronic and synchronic perspective. Focusing on all audiovisual translation techniques and encompassing theoretical and methodological approaches from translation, media and film studies, it aims to become a reference for students and scholars across these fields.*

Current Oculomotor Research

Physiological and Psychological Aspects

Springer Science & Business Media *This volume contains the proceedings of the Ninth European Conference on Eye Movements (ECEM 9), held in Ulm, Germany, on September 23-26, 1997. ECEM 9 continued a series of conferences initiated by Rudolf Groner of Bern, Switzerland, in 1981 which, from its very beginning, has brought together scientists from very diverse fields with a common interest in*

eye movements. About 40 of the papers presented at ECEM 9 have been selected for presentation in full length while others are rendered in condensed form. There is a broad spectrum of motives why people have become involved in, and fascinated by, eye movement research. Neuroscientists have been allured by the prospect of understanding anatomical findings, single unit recordings, and the sequels of experimental lesions in terms of the clearly defined system requirements and the well documented behavioural repertoire of the oculomotor system. Others have been attracted by the richness of this repertoire and its dependence on an intricate hierarchy of factors spanning from "simple" reflexes to visual pattern recognition and spatio-temporal prediction. Neurologists, neuro-ophthalmologists and neuro-otologists have long standing experience with eye movements as sensitive indicators of lesions in the brain stem, the midbrain, and the cerebellum. By studying oculomotor malfunctions they have made, and are continuing to make, important contributions to our understanding of oculomotor functions.

Handbook of Neuropsychology and Aging

Springer Science & Business Media Leaders in neuropsychology, behavioral neurology, speech and language science, neuropsychiatry, and many other disciplines contribute to this volume, the first comprehensive review of knowledge in the field. They discuss a wide range of disorders, including areas of recent research - such as frontal lobe dementias and the neuropsychological aspects of late life depression - and clinical problems typically given insufficient consideration in other works, such as seizure disorder, head injury, and mental retardation. Normal aging is also covered in detail, and assessment procedures and clinical interventions are given thorough treatment. Other highlights include discussions of guardianship and caregiving personality and behavior, psychotic disorders, Alzheimer's, and head trauma.

Design and the Digital Divide

Insights from 40 Years in Computer Support for Older and Disabled People

Springer Nature Demographic trends and increasing support costs means that good design for older and disabled people is an economic necessity, as well as a moral imperative. Alan Newell has been described as "a visionary who stretches the imagination of

all of us" and "truly ahead of his time." This monograph describes research ranging from developing communication systems for non-speaking and hearing-impaired people to technology to support older people, and addresses the particular challenges older people have with much modern technology. Alan recounts the insights gained from this research journey, and recommends a philosophy, and design practices, to reduce the "Digital Divide" between users of information technology and those who are excluded by the poor design of many current systems. How to create and lead interdisciplinary teams, and the practical and ethical challenges of working in clinically related fields are discussed. The concepts of "Ordinary and Extra-ordinary HCI", "User Sensitive Inclusive Design" , and "Design for Dynamic Diversity", and the use of "Creative Design" techniques are suggested as extensions of "User Centered" and "Universal Design." Also described are the use of professional theatre and other methods for raising designers' awareness of the challenges faced by older and disabled people, ways of engaging with these groups, and of ascertaining what they "want" rather than just what they "need." This monograph will give all Human Computer Interaction (HCI) practitioners and designers of both mainstream and specialized IT equipment much food for thought. Table of Contents: 40 years--Highlights and a Brief Review / Communication Systems for Non-Speaking and Hearing-Impaired People / TV Subtitling for Hearing-Impaired People / Word Prediction for Non-Speaking People and Systems for those with Dyslexia / Providing Reusable Conversation for Non-Speaking People / Story Telling and Emotion in Synthetic Speech / Lessons Learned from Designing AAC Devices / IT Systems for Older People / Designing IT Systems for Older People / Ordinary and Extra-Ordinary Human Computer Interaction / User Sensitive Inclusive Design / The Use of Professional Theatre / Attacking the Digital Divide

Research on e-Learning and ICT in Education Technological, Pedagogical and Instructional Perspectives

Springer *This book is an essential text for researchers and academics seeking the most comprehensive and up-to-date coverage of all aspects of e-learning and ICT in education. It provides expanded peer-reviewed content from research presented at the 9th Panhellenic Conference on ICT in Education. It focuses on providing original research on the most cutting edge e-Learning technologies, including CSCL, ICT based learning, ICT and instructional design, serious games and game design, virtual learning environments, robotics in education, ubiquitous learning, distance learning, digital literacies, learning analytics, social media in*

education and e-assessment.

Best of the Journals in Rhetoric and Composition 2019

Parlor Press LLC *Best of the Journals in Rhetoric and Composition 2019* represents the result of a nationwide conversation—beginning with journal editors, but expanding to teachers, scholars and workers across the discipline of Rhetoric and Composition—to select essays that showcase the innovative and transformative work now being published in the field's journals. Representing both print and digital journals, the essays featured here explore issues ranging from classroom practice to writing in global and digital contexts, from border rhetorics to social justice research. Together, the essays provide readers with a rich understanding of the present and future direction of the field. The anthology features work by the following authors and representing these journals: Amber Simpson and Kristi Girdharry | Elaine Richardson and Alice Ragland (*Community Literacy Journal*) | Shari J. Stenberg (*Rhetoric Society Quarterly*) | David Riche (*Literacy in Composition Studies*) | Eileen Kogl Camfield, Lara Killick, and Ruth Lewis (*Journal of Teaching Writing*) | Elizabeth G. Allan (*Pedagogy*) | Christina Saidy (*WPA: Writing Program Administration*) | Anthony Warnke and Kirsten Higgins (*Teaching English in the Two-Year College*) | Cati V. de los Ríos and Kate Seltzer (*Research in the Teaching of English*) | Romeo García (*Writing Center Journal*) | Wendy Pfrenger (*Journal of Basic Writing*) | Janine Butler (*Rhetoric Review*) | Pamela Takayoshi (*College Composition and Communication*) | Maria Novotny and John T. Gagnon (*Reflections*) | Kate Vieira (*Writing on the Edge*)

Cancer in Companion Animals, An Issue of Veterinary Clinics of North America: Small Animal Practice

Elsevier Health Sciences *This issue of Veterinary Clinics: Small Animal Practice*, edited by Dr. Philip Bergman and Dr. Craig Clifford, focuses on Cancer in Companion Animals. Topics include: Novel Non-Invasive Diagnostics; MCT: Cytologic and Histologic Grading Update; Sentinel LN & Sx Oncology Update; RT Oncology Update; Novel Prescriptions for LSA; Targeted Prescriptions Update; Electrochemotherapy; Tumor Ablation; Anorexia and the Cancer Patient; Histiocytic Sarcoma and HSA; Cancer Immunotherapies; and Personalized Cancer Medicine.

Understanding Human Behavior

Harcourt College Pub

The Companion Guide for Lies Women Believe

A Life-Changing Study for Individuals and Groups

Moody Publishers *The Companion Guide for Lies Women Believe is made up of ten sessions and is designed for individuals and small groups. Each chapter includes the following features: -In a Nutshell--gives you an overview of the chapter to be studied from Lies Women Believe and reminds you of the lies discussed within that chapter. -Exploring the Truth--offers a daily personal study for you to complete during the course of the week between your small group meetings. Each day's study includes a few pages to read from Lies Women Believe and then questions to answer under the subtitles "Realize," "Reflect," and "Respond." -Walking Together in the Truth--provides questions to be discussed when your small group meets. Now there is a resource that will help you go deeper with the truths from Nancy's best-selling book Lies Women Believe. These penetrating questions will make you and your friends think and wrestle with the Truth as you search the Bible for answers to tough issues. Truth is not just something to know but something to live out in the laboratory of life as you apply the Word to real-life situations. The Companion Guide for Lies Women Believe is ideal for small groups, Bible Studies, and Sunday school classes.*

Nonmalignant Hematology

Expert Clinical Review: Questions and Answers

Springer *This book, in Q&A format, addresses a wide range of clinically relevant topics and issues in Nonmalignant Hematology, or "Benign Hematology," with a view to offering a robust, engaging tool that will assist every hematologist and oncologist (pediatric and adult equally) in making decisions during day-to-day practice. The entire spectrum of the specialty is covered in more than 60 exceptional chapters written by acknowledged authorities in the field. The content is organized into well-designed broad sections on*

red cell disorders, platelet and coagulation disorders, coagulopathy in systemic diseases, thromboembolic disease and its management (including surgical), immune system and related disorders, hemostasis and thrombosis during pregnancy and in the newborn and elderly, and Transfusion Medicine. A key aspect of the book is the opportunity it affords expert physicians to express well-reasoned opinions regarding complex issues in Nonmalignant Hematology. Readers will find that it provides a practical and immediately applicable compendium of answers to often complex and vexing questions. It will appeal to residents, fellows, house officers and more experienced practitioners around the globe.

Nuclear Science Abstracts

NSA is a comprehensive collection of international nuclear science and technology literature for the period 1948 through 1976, predating the prestigious INIS database, which began in 1970. NSA existed as a printed product (Volumes 1-33) initially, created by DOE's predecessor, the U.S. Atomic Energy Commission (AEC). NSA includes citations to scientific and technical reports from the AEC, the U.S. Energy Research and Development Administration and its contractors, plus other agencies and international organizations, universities, and industrial and research organizations. References to books, conference proceedings, papers, patents, dissertations, engineering drawings, and journal articles from worldwide sources are also included. Abstracts and full text are provided if available.

Nuclear Regulatory Commission

Oversight of 2003 Programs : Hearing Before the Subcommittee on Clean Air, Climate Change, and Nuclear Safety of the Committee on Environment and

Public Works, United States Senate, One Hundred Eighth Congress, First Session, February 13, 2003
