### Balancing Copyright Law in the Digital Age

### Comparative Perspectives

*Springer* **This book focuses on the thorny and highly topical issue of balancing copyright in the digital age. The idea for it sprang from the often heated debates among intellectual property scholars on the possibilities and the limits of copyright. Copyright law has been broadening its scope for decades now, and as a result it often clashes with other rights (frequently, fundamental rights), raising the question of which right prevails. The papers represent the product of intensive research by experts, who employ rigorous interpretative methodologies while keeping an eye on comparison and on the impacts of new technologies on law. The contributions concentrate on the "propertization" of copyright; on the principle of exhaustion of the distribution right; on the conflict between users' privacy and personal data needs; and on the balance between copyright and academic freedom. Starting from the difficulties inherently connected to the difficult task of balancing rights that respond to opposing interests, each essay analyzes techniques and arguments applied by institutional decision-makers in trying to solve this dilemma. Each author applies a specific methodology involving legal comparison, while taking into account the European framework for copyright and related rights. This work represents a unique piece of scholarship, in which a single issue is read through different lenses, demonstrating the need to reconcile copyright with other fundamental areas of law.**

### Rooted in Decency

### Finding Inner Peace in a World Gone Sideways

*Colleen Doyle Bryant* **What happened to common decency? And how do we get to more kindness and cooperation? Take a quick scan of the headlines and... wow. From disrespect to elaborate deceptions, it's easy to question whether indecency has taken root in our society. Some people are doing what they think is "right" while others are wondering how they could do something so terribly, morally "wrong." It can make you wonder, Do we even share common values anymore? Rooted in Decency reveals some surprising reasons behind**

why people are acting so divisively toward each other and why that can make life feel so off-balance. While it's based on intriguing research from modern science to ancient moral philosophy, *Rooted in Decency* is written in straightforward language for a busy audience. Each chapter is a short conversation that presents brilliant insights—from neuroscience to happiness science, from Aristotle to Buddha—that bring new light to today's moral dilemmas. Find intriguing discussions like: Why people are so willing to believe lies How happiness is tied to self-respect Which core values the world's major religions have in common Why you can't shame someone into agreeing with you Taken alone, each chapter offers an "a-ha" insight that can change the tone of how we relate to each other. Or, journey through all the chapters and discover that we do, in fact, share common values—and discover actionable steps that can help society get back to a place that's rooted in decency.

## Streaming and Copyright Law

### An end-user perspective

*Taylor & Francis* This book examines the challenges posed to Australian copyright law by streaming, from the end-user perspective. It compares the Australian position with the European Union and United States to draw lessons from them, regarding how they have dealt with streaming and copyright. By critically examining the technological functionality of streaming and the failure of copyright enforcement against the masses, it argues for strengthening end-user rights. The rising popularity of streaming has resulted in a revolutionary change to how digital content, such as sound recordings, cinematographic films, and radio and television broadcasts, is used on the internet. Superseding the conventional method of downloading, using streaming to access digital content has challenged copyright law, because it is not clear whether end-user acts of streaming constitute copyright infringement. These prevailing grey areas between copyright and streaming often make end-users feel doubtful about accessing digital content through streaming. It is uncertain whether exercising the right of reproduction is appropriately suited for streaming, given the ambiguities of "embodiment" and scope of "substantial part". Conversely, the fair dealing defence in Australia cannot be used aptly to defend end-users' acts of streaming digital content, because end-users who use streaming to access digital content can rarely rely on the defence of fair dealing for the purposes of criticism or review, news reporting, parody or satire, or research or study. When considering a temporary copy exception, end-users are at risk of being held liable for infringement when using streaming to access a website that contains infringing digital content, even if they lack any knowledge about the content's infringing nature. Moreover, the grey areas in circumventing geo-blocking have made end-users hesitant to access websites through streaming because it not clear whether technological protection measures apply to geo-blocking. End-users have a severe lack of knowledge about whether they can use circumvention methods, such as virtual private networks, to access streaming websites without being held liable for copyright infringement. Despite the intricacies between copyright and access to digital content, the recently implemented website-blocking laws have emboldened copyright owners while suppressing end-users' access to digital content. This is because the principles of proportionality and public interest have been given less attention when determining website-blocking injunctions.

### The Balancing of Interests in Environmental Law in Africa

*PULP* "Now that economic development is starting to pick up in many countries in Africa, the question arises how such development can be balanced with the need for adequate environmental protection. This crucial issue, inherent in the notion of sustainable development, is addressed in this innovative and path-breaking volume. For the first time, academics from seventeen African countries have joined forces to analyse the way in which economic and environmental interests are balanced in their legal systems. The authors all use a common framework to improve the comparability of the country studies. The different country-related chapters do not only provide insights into the formally applicable legal rules (law in the books), but given that the book brings together academics aware of the practice in Africa, they also describe the way in which environmental policy functions in practice (law in action). Many case studies, with conceptual analyses are provided of pollution incidents and the way in which administrative agencies or courts have on those occasions balanced the interests between the economy, society and the environment. A critical comparative analysis by the editors points at tendencies towards convergence and points of divergence between the African countries. Suggestions for policy reform are also formulated, showing African countries how they can benefit from experiences in the US and Europe. This thought provoking volume is a must for anyone (academic, policymaker or practitioner) interested in sustainable development generally and in Africa in

particular."--P. [4] of cover.

The Right of States to Regulate in International Investment Law

The Search for Balance Between Public Interest and Fair and Equitable Treatment

*Kluwer Law International* **Due to the ongoing recent expansion of public interest issues worldwide, the state's right to regulate has been recaptured as a prominent concept in international investment law. The fair and equitable treatment (FET) standard provision in the text of an international investment agreement (IIA) has become a detailed clause clarifying the specific obligations of a state towards an investor under the FET standard. However, striking the right balance between the interests of host states and investors in these new treaty formulations has proved to be challenging. This book greatly clarifies the field by offering the in-depth analysis of the application of the state's right to regulate in relation to FET standard provisions in IIAs and to decisions by arbitral tribunals in FET cases. Recognising that the role of tribunals is to balance the state's public interests and the interests of the investor when interpreting and applying the FET standard, the author pursues such seminal issues and topics as the following: the legitimacy of the objective of the state's measure; obligations and responsibilities of investors towards a host state; the nature and impact of a change to a national regulatory framework; special economic and**

sociopolitical circumstances in a host state; and due diligence and risk assessment as a condition for the protection of an investor's legitimate expectations. Multiple IIAs concluded by the OECD Member States, as well by Russia and China between the developing countries, and the prominent investment law cases on the FET standard are examined in detail. The analysis pays particular attention to how investment jurisprudence in FET cases has been reflected in such new IIAs as the Comprehensive Economic and Trade Agreement between the European Union (EU) and Canada (CETA), the EU-Vietnam FTA and the EU-Singapore FTA. These case studies demonstrate the evolution of the IIAs' FET standard provisions and how they balance the application of the FET standard and the state's right to regulate. Suggestions are provided for drafting formulations of the FET standard that can contribute to achieving such a balance. In the clear light it sheds on the legal conditions under which states may regulate in the public interest and its contribution to the reforms that are currently taking place in the field of international investment law, this book constitutes an exemplary framework to evaluate investment decisions on the FET standard and the right to regulate. It is sure to prove extremely useful for practitioners who work on investment cases, policymakers involved in negotiating and drafting of IIAs, policy advisors of governmental and non-governmental organisations and academics in international investment law.

EU Internet Law in the Digital Single Market

*Springer Nature* **With the ongoing evolution of the digital society challenging the boundaries of the law, new questions are arising - and new answers being given - even now, almost three decades on from the digital revolution. Written by a panel of legal specialists and edited by experts on EU Internet law, this book provides an overview of the most recent developments affecting the European Internet legal framework, specifically focusing on four current debates. Firstly, it discusses the changes in online copyright law, especially after the enactment of the new directive on the single digital market. Secondly, it analyzes the increasing significance of artificial intelligence in our daily life. The book then**

addresses emerging issues in EU digital law, exploring out of the box approaches in Internet law. It also presents the last cyber-criminality law trends (offenses, international instrument, behaviors), and discusses the evolution of personal data protection. Lastly, it evaluates the degree of consumer and corporate protection in the digital environment, demonstrating that now, more than ever, EU Internet law is based on a combination of copyright, civil, administrative, criminal, commercial and banking laws.

## The Utopian Human Right to Science and Culture

## Toward the Philosophy of Excendence in the Postmodern Society

*Routledge* This book explores the question of whether the ideal right to science and culture exists. It proposes that the human right to science and culture is of a utopian character and argues for the necessity of the existence of such a right by developing a philosophical project situated in postmodernity, based on the assumption of 'thinking in terms of excendence'. The book brings a novel and critical approach to human rights in general and to the human right to science and culture in particular. It offers a new way of thinking about access to knowledge in the postanalogue, postmodern society. Inspired by twentieth-century critical theorists such as Levinas, Gadamer, Bauman and Habermas, the book begins by using excendence as a way of thinking about the individual, speech and text. It considers paradigms arising from postanalogue society, revealing the neglected normative content of the human right to science and culture and proposes a morality, dignity and solidarity situated in a postmodern context. Finally the book concludes by responding to questions on happiness, dignity and that which is social. Including an Annex which presents the author's private project related to thinking in the context of the journey from 'myth to reason', this book is of interest to researchers in the fields of philosophy and the theory of law, human rights, intellectual property and social theory.
