Worldviews of Aspiring Powers

Domestic Foreign Policy Debates in China, India, Iran, Japan and Russia

Oxford University Press *Worldviews of Aspiring Powers* provides a serious study of the domestic foreign policy debates in five world powers who have gained more influence as the US's has waned: China, Japan, India, Russia and Iran. Featuring a leading regional scholar for each essay, each essay identifies the most important domestic schools of thought—nationalists, realists, globalists, idealists/exceptionalists—and connects them to the historical and institutional sources that fuel each nation's foreign policy experience. While scholars have applied this approach to US foreign policy, this book is the first to track the competing schools of foreign policy thought within five of the world's most important rising powers. Concise and systematic, *Worldviews of Aspiring Powers* will serve as both an essential resource for foreign policy scholars trying to understand international power transitions and as a text for courses that focus on the same.

British Business in Asia Since 1860

Cambridge University Press This 1989 book examines the experience of British business in Asia since 1860, with primary focus on the impact of British commerce in the region. Following an introduction by the editors, there are essays by leading specialist historians on British businesses in Iran, India, Thailand, Malaysia, China, Russian Asia and Japan.

War or Peace

The Struggle for World Power

Oxford University Press Today's international climate is one of disorder. A League of Dictators (China, Russia, Iran) is threatening the superpower status of the United States of America, and the liberal international order it has underwritten. A piecemeal Third World War seems to have begun. Eminent economist Deepak Lal argues that the global financial crisis was the proximate cause for a revanchist China and Russia believing that the liberal economic order promoted by the US was on its deathbed, and their illiberal

systems were the future. But Lal argues that reports of the economic woes of the US are greatly exaggerated—as are those of China's prospects and Russia's power. With a new regime, and the US' continuing overwhelming economic and military strength, it can maintain its global hegemony by challenging the League of Dictators. India is increasingly a partner in this effort to maintain a liberal global order, by helping contain China's burgeoning influence.

The China Threat

Perceptions, Myths and Reality

Routledge This book examines perceptions of the 'China Threat', and governments' policies in response to this perceived threat in a wide range of countries, including the United States, Russia, Europe, Japan, South Korea, Indonesia, Singapore, Malaysia, the Philippines, Vietnam, India, Pakistan, and countries in the Middle East. Perceptions of the Chinese themselves are also looked at, the current security concerns and policies of each country are examined in detail, especially the policy of engagement, and future prospects for relations with China are assessed.

Writing Travel in Central Asian History

Indiana University Press For centuries, travelers have made Central Asia known to the wider world through their writings. In this volume, scholars employ these little-known texts in a wide range of Asian and European languages to trace how Central Asia was gradually absorbed into global affairs. The representations of the region brought home to China and Japan, India and Persia, Russia and Great Britain, provide valuable evidence that helps map earlier periods of globalization and cultural interaction.

India and Emerging Asia

SAGE Publications India In recent years, Asia's economic and strategic environment has been transformed in a fundamental sense. The emerging 'Asian Economic Community'—encompassing ASEAN, China, Japan, India and South Korea—is being widely viewed as the centre of gravity of the global economy. Because of its strategic position, India is destined to play a significant role in shaping the emerging profile of Asia. Against this background, this volume explores Asia's dramatic re-emergence on the global scene as well as India's role in ensuring peace, security, stability and development in the continent. In recent years, India has redefined its position within Asia and has emerged as a significant player. The contributors offer new perspectives on Asia concerning the nature of its politics and governance, the reasons for its insecurity, the need for greater regional cooperation, and its intrinsic strengths and weaknesses. They implicitly or explicitly share the view that the 'twenty-first century belongs to Asia'.

China-Russia Security Relations : Strategic Parallelism Without Partnership Or Passion?

India's Great Power Politics

Managing China's Rise

Taylor & Francis This book examines India's foreign and defence policy changes in response to China's growing economic and military power and increased footprint across the Indo-Pacific. It further explores India's role in the rivalry between China and the United States. The book looks at the strategic importance of the Indian Ocean Region in the Indo-Pacific geopolitical landscape and how India is managing China's rise by combining economic cooperation with a wide set of balancing strategies. The authors in this book critically analyse the various tools of Indian foreign policy, including defence posture, security alignments, and soft power diplomacy, among others, and discuss the future trajectory of India's foreign policy and the factors which will determine the balance of power in the region and the potential risks involved. The book provides detailed insights into the multifaceted and complex relationship between India and China and will be of great interest to researchers and students of international relations, Asian studies, political science, and economics. It will also be useful for policymakers, journalists, and think tanks interested in the India-China relationship.

What is Asia to Us? (Routledge Revivals)

Russia's Asian Heartland Yesterday and Today

Routledge This book, first published in 1990, considers the uneasy relationship between Russia and Soviet Central Asia. Chapters examine both the significance of Asia to the Russian mind and the place that Asia has occupied in Russian geopolitical thinking in the last hundred years, showing that outbreaks of violence are simply a manifestation of a long-standing tension. This is a remarkable and comprehensive study, which will be of great value to those concerned with the history and future of Central Asia and Siberia.

Excerpt: The Russo-Japanese War (Japanese: Romaji: Nichi-Ro Sens; Russian: Russko-yaponskaya voyna; simplified Chinese: traditional Chinese: pinyin: Ri'e Zhanzh ng, 8 February 1904 - 5 September 1905) was "the first great war of the 20th century" which grew out of the rival imperial ambitions of the Russian Empire and Japanese Empire over Manchuria and Korea. The major theatres of operations were Southern Manchuria, specifically the area around the Liaodong Peninsula and Mukden, the seas around Korea, Japan, and the Yellow Sea. The Russians sought a warm water port on the Pacific Ocean, for their navy as well as for maritime trade. Vladivostok was only operational during the summer season, but Port Arthur would be operational all year. From the end of the First Sino-Japanese War and 1903, negotiations between Russia and Japan had proved impractical. Japan chose war to maintain dominance in Korea. The resulting campaigns, in...

Asia-Gulf Economic Relations in the 21st Century

The Local to Global Transformation

Asia constitutes the hub of the transformation of global economic power today. The Gulf, itself part of Asia, is of increasing importance in this transformation. This book documents the growing interactions between the economies of the Gulf states and those of the rest of Asia. These relationships are critical to how the world economy develops over the next decade, and how economic (and perhaps strategic) power is distributed. This volume assembles cutting-edge thinking by 16 specialists on a wide variety of topics covering Arab Gulf relations with China, Japan, ASEAN, Korea and India, as well as with Russia, Iran and Turkey.

Power Realignment in Asia

China, India and the United States

SAGE Publishing India China's emergence as a great power is transforming the world, affecting its security, economy and physical environment. Power Realignment in Asia: China, India and the United States explores the impact of China's rise on relations among China, India and the United States. The topics covered in the collection span traditional security issues-political-military affairs and military modernization-to new challenges posed by rapid and deep economic integration, to global issues like energy security and environmental degradation accompanying rapid economic growth. Each of these issues affects the triangular dynamic among China, India and the United States. A special feature of this volume is that it is an informed assessment of an under-researched theme- China's complex role in simultaneously promoting and inhibiting Indo-U.S. engagement. It examines the many shades of strategic ambiguity, reflected most recently in China's response to the historic Indo-U.S. civil nuclear initiative. This work will be an important resource for all those interested in Asia's security politics, the American response to the rise of China and India and the changing dynamic of Asian balance of power.

China, The United States, and the Future of Central Asia

U.S.-China Relations

NYU Press The first of a three-volume series on the interaction of the US and China in different regions of the world, China, the United States, and the Future of Central Asia explores the delicate balance of competing foreign interests in this resource-rich and politically tumultuous region. Editor David Denoon and his internationally renowned set of contributors assess the different objectives and strategies the U.S. and China deploy in the region and examine how the two world powers are indirectly competitive with one another for influence in Central Asia. While the US is focused on maintaining and supporting its military forces in neighboring states, China has its sights on procuring natural resources for its fast-growing economy and preventing the expansion of fundamentalist Islam inside its borders. This book covers important issues such as the creation of international gas pipelines, the challenges of building crucial transcontinental roadways that must pass through countries facing insurgencies, the efforts of the US and China to encourage and provide better security in the region, and how the Central Asian countries themselves view their role in international politics and the global economy. The book also covers key outside powers with influence in the region; Russia, with its historical ties to the many Central Asian countries that used to belong to the USSR, is perhaps the biggest international presence in the area, and other countries on the region's periphery like Iran, Turkey, Pakistan, and India have a stake in the fortunes and future of Central Asia as well. A comprehensive, original, and up-to-date collection, this book is a wide-ranging look from noted scholars at a vital part of the world which is likely to receive more attention and face greater instability as NATO forces withdraw from Afghanistan.

Routledge Handbook of Asia in World Politics

Routledge Asia is a complex and diverse continent, which has seen the scope and pace of transformation increase rapidly over the past 30 years. In turn, the economic growth and social change seen in the region, combined with new global security profiles and environmental challenges, have contributed to placing Asia at the forefront of international affairs. This Handbook brings together leading scholars of different disciplines, including Politics and International Relations, Security Studies and Law, to provide a comprehensive analysis of both the prospects and problems which have emerged from Asia's rise. Examining how developments across the continent have influenced global politics and how the region has responded to the international community in the modern era, the sections cover: Major actors in Asian politics, especially China, Japan and India, International relations in Asia and intra-Asian tensions Special issues of world politics in Asia including modern conflicts in and attitudes towards the Middle East The Routledge Handbook of Asia in World Politics will be useful to students and scholars of Global Politics, International Relations and Asian Studies.

Global Security Watch--India

ABC-CLIO This new volume in the Global Security Watch series examines the contemporary foreign, military, and security policies of India as it moves towards becoming a formidable global power in the coming decades. * Includes brief biographies of important figures * Contains a chapter that predicts where India will stand in 2025 * Provides a bibliography of primary sources for additional reading

Asian Juggernaut : The Rise Of China India And Japan

HarperCollins A revelatory narrative marked by an incisive and insightful analysis of Asia's pivotal role on the world stage... A resurgent Asia is now emerging as the global pivot. With the world's fastest-growing markets, fastest-rising military expenditures and

most serious hot spots, Asia holds the key to the future global order. Underpinning its renaissance, Asia has become the world's economic locomotive even as its arts, fashion and cuisine regain international recognition. Yet, with interstate competition sharpening, Asia faces complex security, energy and developmental challenges in an era of globalization, including how to move beyond historical legacies and tap its dynamism for greater prosperity and well-being. The colossal shift in global geopolitics presents new opportunities to Asia and tests its ability to assume a bigger role in international relations. This book examines the ascent of Asia by focusing on its three main powers - China, India and Japan. A qualitative reordering of power in an Asia characterized by tectonic shifts is challenging strategic stability and affecting equations between these powers. How the China-Japan, China-India and Japan-India equations evolve in the coming years will have a crucial bearing on Asian and global security. Constituting a strategic triangle, these powers are Asia's largest economies. Their interests are getting so intertwined that the pursuit of unilateral solutions by any one of them will disturb the peaceful environment on which their continued economic growth and security depend. The author analyses the ramifications of the emerging Chinese colossus. He also highlights the fact that Japan's quiet, undeclared transition from pacifism to a 'normal' state will help shape the future of Asian and global geopolitics. Even as it has reinvigorated its military ties with the United States, Japan is beginning to rethink its security and international role. The third major Asian player, India, is coming of age by displaying greater realism in economic and foreign policies and moving towards geopolitical pragmatism. India now recognizes that it can wield international power only by building up its economic and military strength. A strong China, a strong Japan and a strong India need to find ways to reconcile their interests in Asia so that they can peacefully coexist and prosper. Given that these powers have not all been strong at the same time before in history, stable political relationships between them are central to Asian security. The book sets out how all states in Asia could benefit from cooperative approaches in which China, India and Japan take the lead.

What Does the World Want from America?

International Perspectives on U.S. Foreign Policy

MIT Press The United States is the only superpower in the world today. Although the media are filled with prescriptions for how Washington might best wield its power, rarely are other countries asked what role they would like the United States to play. In *What Does the World Want from America?*, writers from twelve countries or regions (Brazil, China, the European Union, France, Germany, India, Iran, Israel, Japan, Russia, Singapore, and South Africa) answer the question, "In an ideal world, what role would you want the United States to perform with your country and region?" Four analysts from the United States then respond, addressing the extent to which overseas opinion should be incorporated into the formulation and conduct of United States foreign policy and recommending what the United States should attempt to do in the world, particularly after the horrific attacks of September 11. *What Does the World Want from America?* serves as a starting point for analysis of the US role in the world and the ends to which US power might be used.

External Powers in Latin America

Geopolitics between Neo-extractivism and South-South Cooperation

Routledge This book examines the role of external powers in Latin America in the 21st century. Non-traditional partners have significantly increased their political and economic engagement with the continent. Five key questions arise: why has this surge taken place; when has it happened; in which regions and sectors is it mostly felt; what is the Latin American perspective; and what are the actual results? The book analyses 16 case studies: the United States, the European Union, China, Russia, Japan, Canada, India, Turkey, Iran, Israel, South Korea, Taiwan, Indonesia, the ASEAN countries, South Africa and Australia. The spectrum of existing explanations in the literature spans from neo-extractivism to South-South cooperation. This volume places them in context and proposes a more multifaceted approach, stressing a combination of systemic factors and internal dynamics both in Latin America and in the external partner countries. Geopolitics still matters and so do nation states, their interests and leaders. Ultimately, this surge in engagement has largely reproduced past patterns. Are new partners that different from the old ones?

The European Union in the Eurasian Space

GRIN Verlag Essay from the year 2006 in the subject Politics - International Politics - Topic: European Union, grade: 1,5 Germany, 4 Finland, University of Tampere, 3 entries in the bibliography, language: English, abstract: The Asian continent becomes more and more important in world politics. In Asia the future markets are located; the labour force is compared to western economies cheap but in the same way well educated and qualified. But probably one of the most important aspects are resources. The energy resources of the future are located on the Eurasian Continent, especially in Central Asia, North Russia and Arab countries. Asian states, in particular China and India will be under the most important global players. Their rapidly economic growth which leads probably in the same way to an increasing military power, makes them rather important which is underlined by India's claim for a permanent seat in the UN Security Council. The Eurasian continent is full of challenges. First; Asian states are competitors on the world markets, but in the same way necessary exporting and investment partners for the west. Second; the Asian continent is a flash point of present and future conflicts which is caused by a huge lack of water resources, an extended diversity of ethnic groups and the competition of power and control over oil, gas and water resources and therefore the control over regions or countries in which the resources are located. Moreover several Asian states as India or Iran have nuclear capability which causes concerns and conflicts as the contemporary debates about Iran show. The following paper analyzes the document "Europe and Asia: A strategic Framework for Enhanced Partnerships" of the Commission of the European Communities in 2001. This document is a strategy paper which gives an overview

how the European Union wants to improve and strengthen its presence in different regions of Asia. First I will give a short overview about the document, its strategies and the problems in the realization of strategies. Further the essay contains an analyze about geopolitics. At last I will compare the EU and USA, relating to their politics in Asia.

Confronting Terrorism in the Pursuit of Power

The National Bureau of Asian Research Strategic Asia 2004?05: Confronting Terrorism in the Pursuit of Power examines the U.S.-led war on terrorism and assesses its impact for the grand strategies of major Asian powers. Confronting Terrorism in the Pursuit of Power is the fourth edition in the Strategic Asia series, and this year's volume is composed of five country studies, four regional studies, and four topical studies. Individual country studies analyze the United States, China, Japan, Korea, and Russia. Regional studies cover Central, South, Southeast, and Southwest Asia. The four topical studies address how broader transnational issues impact regional, political, economic, and security dynamics. Topics for this year's program include: energy security in Asia, the proliferation of weapons of mass destruction, alternative futures for North Korea, and science and technology trends in Asia. All chapters examine the short- and long-term implications for U.S. interests in Asia, and aim to sharpen the ability of U.S. policymakers to craft effective and credible strategies toward the region.

The China Syndrome

Grappling With An Uneasy Relationship

Harper Collins As the balance of power shifts from the West to the East, the relationship between the two regional giants, China and India, gains significance. Their relationship will determine to a great extent the new political architecture that takes shape in Asia and the world at large. Nor are the two powers unaware of this. As a Chinese premier meeting the Indian prime minister is reported to have said, 'When we shake hands, the whole world will be watching.' The China Syndrome seeks to decipher the complex, multi-

layered relationship between the two countries, and the strategy or lack of it in India's China policy. Given the emerging scenario, it is a subject of considerable interest.

External Powers and the Gulf Monarchies

Routledge The Gulf monarchies have been generally perceived as status quo actors reliant on the USA for their security, but in response to regional events, particularly the Arab Spring of 2011, they are pursuing more activist foreign policies, which has allowed other international powers to play a larger role in regional affairs. This book analyses the changing dynamic in this region, with expert contributors providing original empirical case studies that examine the relations between the Gulf monarchies and extra-regional powers, including the USA, Russia, China, India, Brazil, Turkey, Japan, South Korea, France, and the United Kingdom. At the theoretical level, these case studies explore the extent to which different international relations and international political economy theories explain change in these relationships as the regional, political and security environment shifts. Focusing on how and why external powers approach their relationships with the Gulf monarchies, contributors ask what motivates external powers to pursue deeper involvement in an unstable region that has seen three major conflicts in the past 40 years. Addressing an under-analysed, yet important topic, the volume will appeal to scholars in the fields of international relations and international political economy as well as area specialists on the Gulf and those working on the foreign policy issues of the extra-regional powers studied.

Skylines in Asia Coloring Book for Kids 1 & 2

ColoringArtist.com When you buy this book you get an electronic version (PDF file) of the interior of this book. Children can bring their imagination to life with this coloring book filled with beautiful skylines of cities on the Asian continent. Skylines in Asia Coloring Book for Kids 1 & 2 contains 80 coloring pages with panoramas of Asian cities. All images are in exactly the same style as the cover. The following Asian cities are featured: Bengaluru, India Amman, Jordan Bandung, Indonesia Delhi, India Dhaka, Bangladesh Indore, India Jerusalem, Israel Kanpur, India Kathmandu, Nepal Lucknow, India Mumbai, India Baghdad, Iraq Ganja, Azerbaijan Surabaya, Indonesia Surat, India Isfahan, Iran Shiraz, Iran Tehran, Iran Vientiane, Laos Nur-Sultan, Kazakhstan Kabul, Afghanistan Manama, Bahrain Phnom Penh, Cambodia Bishkek, Kyrgyzstan Yerevan, Armenia Muscat, Oman Faisalabad, Pakistan Karachi, Pakistan Multan, Pakistan Kuwait City, Kuwait Pyongyang, North Korea Bandar Seri Begawan, Brunei Beirut, Lebanon Macau, People's Republic of China Thimphu, Bhutan Kuala Lumpur, Malaysia Tokyo, Japan Ulaanbaatar, Mongolia Nay Pyi Taw, Myanmar Osaka, Japan Nagpur, India Yekaterinburg, Russia Novosibirsk, Russia Ufa, Russia Bhopal, India Chennai, India Dubai, United Arab Emirates Hyderabad, India Jaipur, India Jakarta, Indonesia Kolkata, India Baku, Azerbaijan Pune, India Mashhad, Iran Tabriz, Iran Mecca, Saudi Arabia Riyadh, Saudi Arabia Almaty, Kazakhstan Dushanbe, Tajikistan Manila, Philippines Doha, Qatar Chongqing, People's Republic of China Guangzhou, People's Republic of China Hangzhou, People's Republic of China Shenyang, People's Republic of China Tianjin, People's Republic of China Wuhan, People's Republic of China Islamabad, Pakistan Lahore, Pakistan Daegu, South Korea Incheon, South Korea Damascus, Syria Singapore Seoul, South Korea Bangkok, Thailand Ashgabat, Turkmenistan Ankara, Turkey Colombo, Sri Lanka Yokohama, Japan Izmir, Turkey Using their favorite colors and art supplies, kids can create personal masterpieces while they develop important skills. Children enjoy coloring independently or socially as they connect with caregivers or friends. This coloring book bundles volumes 1 and 2 at a discounted price. A highly personal gift for a young explorer in your life. Printed on single-sided pages to prevent smudging. Hours of imaginative fun. Accessible and appealing to budding artists. Coloring isn't just fun for kids. It will also: Improve focus and attention to detail. Develop grip, hand-eye coordination, and fine motor skills. Increase patience. Build confidence. Reduce stress and frustration. Click Add to Cart at the top of this page to give these benefits to a child you love. Learn more and see our entire collection at www.coloringartist.com or contact us at info@coloringartist.com. If your child enjoys their coloring book, please leave a positive review on this page to help us reach more budding artists.

Earth Wars

The Battle for Global Resources

John Wiley & Sons An international business journalist, exploring the problems, potential solutions and inevitable tensions as the global competition for scarce natural resources heats up, takes a forward-looking approach to this pressing issue that goes beyond "big power" politics.

Accommodating Rising Powers

Past, Present, and Future

Cambridge University Press As the world enters the third decade of the twenty-first century, far-reaching changes are likely to occur. China, Russia, India, and Brazil, and perhaps others, are likely to emerge as contenders for global leadership roles. War as a system-changing mechanism is unimaginable, given that it would escalate into nuclear conflict and the destruction of the planet. It is therefore essential that policymakers in established as well as rising states devise strategies to allow transitions without resorting to war, but dominant theories of International Relations contend that major changes in the system are generally possible only through violent conflict. This volume asks whether peaceful accommodation of rising powers is possible in the changed international context, especially against the backdrop of intensified globalization. With the aid of historic cases, it argues that peaceful change is possible through effective long-term strategies on the part of both status quo and rising powers.

The Engagement of India Strategies and Responses

Georgetown University Press This book analyzes the strategies that different states have used to engage a rising India, their successes and failures, as well as India's responses. A multinational team of contributors examine the ways in which Australia, China, Japan, Russia, and the United States have each sought to engage India for various purposes, and they explore the ways in which India has responded. The book also assesses India's own strategies to engage with Singapore, Vietnam, Indonesia, and the Central Asian republics. This informative analysis of the foreign relations of a key rising power, and first comparative study of engagement strategies, casts light on the changing nature of Indian foreign policy and the processes that shape its future.

Reproductive States

Global Perspectives on the Invention and Implementation of Population Policy

Oxford University Press When it comes to government's role in personal matters such as family planning, most bristle at any interference from the State on how to exercise their reproductive rights. China's infamous "one child" policy is a well-known example of reproductive politics, but history is filled with other examples of governmental population control to advance its interests. Reproductive States is the first volume of a collection of case studies that explores when and how some of the most populous countries in the world invented and implemented state population policies in the 20th century. The authors, scholars specializing in reproductive politics, survey population policies from key countries on five continents to provide a global perspective. Regardless of the type of government or its cultural history, many of these countries have developed similar policies to control their populations and attempt to combat social problems such as poverty and hunger. However, the common denominator is that states have used women's bodies as a political resource. Far from being just an overseas problem, this volume illustrates how other countries have developed their strategies in response to goals and tactics driven by the United Nations and the United States. Due to fears of a post-World War II "population bomb" and uncertainty of how to deal with the world's poor after the Cold War, the U.S. and the Soviet Union led the charge among nations to devise strategies to control their populations, but in different ways. The U.S. and some European countries pressed the poor and ethnic minorities to limit reproduction. China's "one child" policy targeted all ranks of society, while Soviet women (who already had few rights) were under surveillance through state-planned services such as medical care and commodity distribution to detect pregnancy. Interweaving biopolitics, gender studies, statecraft, and world systems, Reproductive States offer reflections on the outcome of such policies and their legacies in our day.
