Environmental Law and Economics Springer This anthology discusses important issues surrounding environmental law and economics and provides an in-depth analysis of its use in legislation, regulation and legal adjudication from a neoclassical and behavioural law and economics perspective. Environmental issues raise a vast range of legal questions: to what extent is it justifiable to rely on markets and continued technological innovation, especially as it relates to present exploitation of scarce resources? Or is it necessary for the state to intervene? Regulatory instruments are available to create and maintain a more sustainable society: command and control regulations, restraints, Pigovian taxes, emission certificates, nudging policies, etc. If regulation in a certain legal field is necessary, which policies and methods will most effectively spur sustainable consumption and production in order to protect the environment while mitigating any potential negative impact on economic development? Since the related problems are often caused by scarcity of resources, economic analysis of law can offer remarkable insights for their resolution. Part I underlines the foundations of environmental law and economics. Part II analyses the effectiveness of economic instruments and regulations in environmental law. Part III is dedicated to the problems of climate change. Finally, Part IV focuses on tort and criminal law. The twenty-one chapters in this volume deliver insights into the multifaceted debate surrounding the use of economic instruments in environmental regulation in Europe.

As a lecturer / trainer / tutor / assessor / curriculum manager, how do you ensure: 1. that all individual learners' needs are identified and met effectively? 2. that full account is taken of disability and learning difficulties when preparing and delivering teaching, learning and assessment strategies? 3. that strategies applied to reduce the barriers to learning experienced by disabled learners and those with learning difficulties are legitimate and reasonable and do not provide them with an unfair advantage? 4. that the most appropriate teaching, learning and assessment methods are used?, and 5. that sessions are planned and delivered effectively (and evidenced accordingly as part of a MICRO-TEACH)? This textbook addresses each of these questions, with supporting research as needed, while remaining tightly focused on the unit's assessment criteria. Out of the three units of the Award in Education and Training, Understanding and Using Inclusive Teaching and Learning Approaches in Education and Training is probably the most demanding to understand and apply. What sets this book apart is the author's application of his considerable experience to this subject area in order to simplify it for those new to teaching and/or new to the subject. This fully updated fourth edition continues to bring together the theory and practice of these skills in an accessible and practical context. The authors draw on their experience of teaching and of law in practice to develop the core skills taught on both undergraduate and postgraduate courses. Skills covered include: • written communication; • mediation; • opinion writing; • drafting; • advocacy; • interviewing; • negotiation; • legal research. The text also considers the professional and ethical context of legal practice, provides an insight into the legal services landscape as well as offering valuable careers advice. Diagrams and flow charts help to explain and develop each skill and each chapter ends with suggestions for further reading. A Practical Guide to Lawyering Skills is essential reading for all undergraduate and vocational law students seeking to develop the necessary skills to work successfully with law in the twenty-first century. **Letters to a Law Student** "The twin moral imperatives under which this edition was written are responsible for most of the new content in this edition, including seven completely new chapters, and also make this the best edition of Letters to a Law Student by a very long way; though this has been achieved without making this edition longer than the previous edition. Various other chapters have been completely rewritten, such as the chapters 'On doing the LNAT' and 'How to answer a problem question'. Other chapters have been updated to reflect Covid-driven innovations in the way universities deliver both education and exams to their students (which innovations may well outlast Covid-19), as well as changes in the rules governing how one qualifies to be a practising solicitor in the UK. The process of writing a new edition of a book is always deeply confounding and shaming. When you write a book, it is like your baby - you can see no imperfections in it and fiercely defend its right to live against all comers. But when the time rolls round to write a new edition, all the ways in which the previous edition could have been better become glaringly obvious, and you begin to look on the old edition with the same cold eye that the newly crowned King Henry V turned on his old drinking companion Falstaff: 'I know thee not, old man' (Henry IV, Part II V.5). The lesson is that perfection is always beyond our grasp. But that does not mean we should not continue grasping at it, and any students or teachers who have constructive suggestions as to how it might be changed for the better shouldn't hesitate to get in touch with me at njm33@cam.ac.uk. I would very much welcome hearing from you"--
