FINANCIAL SERVICES LAW AND COMPLIANCE IN AUSTRALIA

Cambridge University Press Up until the global credit crisis in 2008, 'Financial Services' was the fastest growing sector of the Australian economy. This growth has had profound implications for individuals, corporations and government. Following extensive review in the last part of the twentieth century, Australia put in place an overarching system for regulating all financial services, replacing a system that was based on separate regulation of products in individual industries. Focusing on the implications of the new system for retail clients - 'financial citizens' - Financial Services Law and Compliance in Australia provides a comprehensive account of the regulatory structure and a detailed analysis of the legislative framework, including discussion of the new regulatory bodies, the new licensing requirements for those wishing to enter the financial services market and the new obligations for those marketing or offering financial services to the public. This is an essential resource for those working in, and advising on, financial services, for students of financial services law, and for anyone needing to understand this new regime in Australia.

MARKET RISK ANALYSIS, PRACTICAL FINANCIAL ECONOMETRICS

John Wiley & Sons Written by leading market risk academic, Professor Carol Alexander, Practical Financial Econometrics forms part two of the Market Risk Analysis four volume set. It introduces the econometric techniques that are commonly applied to finance with a critical and selective exposition, emphasising the areas of econometrics, such as GARCH, cointegration and copulas that are required for resolving problems in market risk analysis. The book covers material for a one-semester graduate course in applied financial econometrics in a very pedagogical fashion as each time a concept is introduced an empirical example is given, and whenever possible this is illustrated with an Excel spreadsheet. All together, the Market Risk Analysis four volume set illustrates virtually every concept or formula with a practical, numerical example or a longer, empirical case study. Across all four volumes there are approximately 300 numerical and empirical examples, 400 graphs and figures and 30 case studies many of which are contained in interactive Excel spreadsheets available from the the accompanying CD-ROM . Empirical examples and case studies specific to this volume include: Factor analysis with orthogonal regressions and using principal component factors; Estimation of symmetric and asymmetric, normal and Student t GARCH and E-GARCH parameters; Normal, Student t, Gumbel, Clayton, normal mixture copula densities, and simulations from these copulas with application to VaR and portfolio optimization; Principal component analysis of yield curves with applications to portfolio immunization and asset/liability management; Simulation of normal mixture and Markov switching GARCH returns; Cointegration based index tracking and pairs trading, with error correction and impulse response modelling; Markov switching regression models (Eviews code); GARCH term structure forecasting with volatility targeting; Non-linear quantile regressions with applications to hedging.

HANDBOOK OF RESEARCH ON INTERNATIONAL CONSUMER LAW

Edward Elgar Publishing This is a truly international effort, and one with a strong commitment to human rights by the highly reputable authors coming from different jurisdictions! The many facets of today's consumer law are presented to the reader, including developing countries a fascinating effort in a dynamically emerging field of law! We are comprehensively informed about such bread and butter areas as advertising, unfair terms, consumer guarantees, product safety and liability, consumer credit, and redress. But traditional consumer law concepts and remedies are facing challenges in more complex areas, like services of general internet where consumers and private users should enjoy equal access to universal services, with the internet where speed must not be a pretext to eliminate standards of fair dealing, with risky investment services under the problematic paradigm shift from investor protection to investor confidence. A book to read, to think about, to work with for everybody interested in the future of consumer markets and law in a time of economic crisis! Norbert Reich, University of Bremen, Germany This is a richly interesting collection of essays, written by leading names in the field. It offers a thoroughly reliable survey of key tensions and challenges in modern consumer law and brilliantly combines thematic overview with detailed analysis. It will stimulate comparative thinking, it will provide a source of information and it will be welcomed by consumer law scholars all over the world. Stephen Weatherill, University of Oxford, UK Consumer law and policy has emerged in the last half-century as a major policy concern for all nations. This Handbook of original contributions provides an international and comparative analysis of central issues in consumer law and policy in developed and developing economies. The Handbook encompasses questions of both social policy and effective business regulation. Many of the issues are common to all countries and are becoming increasingly globalised due to the growth in international trade and technological developments such as the Internet. The authors provide a broad coverage of both substantive topics and institutional questions concerning optimal approaches to enforcement and the role of class actions in consumer policy. It also includes comparative insights into the influential EU and US models of consumer law and relates consumer law to contemporary trends in human rights law. Written by a carefully selected group of international experts, this text represents an authoritative resource for understanding contemporary and future developments in consumer law. This Handbook will provide students, researchers and policymakers with an insight to the main policy debates in each context and provide models of legal regulation to assist in the evaluation of laws and the development of consumer law and policy.

LAW AND INTERSYSTEMIC COMMUNICATION

UNDERSTANDING 'STRUCTURAL COUPLING'

Routledge With contributions from experts in the field of sociology of law, this book provides an overview of current perspectives on socio-legal studies. It focuses particularly on the relationship between law and society described in recent social systems theory as 'structural coupling'. The first part of the book presents a reconstruction of theoretical tendencies in the field of socio-legal studies, characterised by the emergence of a transnational model of legal systems no longer connected to territorial borders and culturally specific aspects of single legal orders. In the following parts of the book, the contributions analyse some concrete cases of interrelation between law and society from an empirical and theoretical perspective.

By introducing key finance concepts with personal and business-related finance examples, this text helps readers understand how the tools of finance can help them in any career or business situation. This edition features strengthened material on financial statements, a discussion on yield curves, new and advanced spreadsheet problems, and updated material.

FUNDAMENTAL PRINCIPLES OF EU LAW AGAINST MONEY LAUNDERING

Routledge This book critically analyses fundamental principles of EU law for the control of international economic crime. Discussing how the reporting system and the exchange of information are at the heart of the global anti-money laundering regime, the study also looks at the inferential force of financial intelligence in criminal proceedings and the responsibilities this places on prosecutors and criminals alike. The author closely examines the application of Article 8(2) of the European Court of Human Rights for the retention and movement of the fingerprints, cellular samples and DNA profiles of unconvicted persons, and argues the incompatibility with the ECHR, along with the effect of socially stigmatising unconvicted persons. The work concludes with exploring how financial regulation has, inter alia, shifted responsibility to businesses and financial institutions to become more transparent and accountable to financial regulators and tax authorities. This critical analysis is essential reading for law students and the Judicial Body, as well as financial crime investigators and regulators.

Longman Publishing Group

RISK MANAGEMENT AND FINANCIAL INSTITUTIONS

Prentice Hall John C. Hull's Financial Risk Management text is the only text to take risk management theory and explain it in a "this is how you do it" manner for practical application in today's real world. We found that most professors are looking for a book that contains up to date information, and is written for application in the real work environment. Hull's text offers students the ability to gain knowledge that will stay with them beyond college and be useful in the real world. Based on one of the most popular MBA courses at University of Toronto entitled "Financial Risk Management", this text focuses on the ways banks and other financial institutions measure market, credit and operational risk. John C. Hull, author of the book "Options, Futures, and Other Derivatives" which became the standard reference text for traders, wrote "Risk Management and Financial Institutions" for use in instruction as well as trade. The practical nature of the book lends itself to a "this is how you do it" presentation style that includes excellent account of the new Basel II regulatory requirements for banks effective in 2007.
