#### ETHICAL AND POLICY ISSUES IN INTERNATIONAL RESEARCH: COMMISSIONED PAPERS AND STAFF ANALYSIS

#### AEROSPACE AMERICA

#### THE FEDERALIST PAPERS

*Yale University Press* This authoritative edition of the complete texts of the Federalist Papers, the Articles of Confederation, the U.S. Constitution, and the Amendments to the U.S. Constitution features supporting essays in which leading scholars provide historical context and analysis. An introduction by Ian Shapiro offers an overview of the publication of the Federalist Papers and their importance. In three additional essays, John Dunn explores the composition of the Federalist Papers and the conflicting agendas of its authors; Eileen Hunt Botting explains how early advocates of women's rights, most prominently Mercy Otis Warren, Judith Sargent Murray, and Charles Brockden Brown, responded to the Federalist-Antifederalist debates; and Donald Horowitz discusses the Federalist Papers from the perspective of recent experiments with democracy and constitution-making around the world. These essays both illuminate the original texts and encourage active engagement with them.

#### CURRENT ISSUES IN SCHOOL LEADERSHIP

*Routledge* *Current Issues in School Leadership* examines controversies about, and affecting, school practices. Focusing on two essential questions--what is important to today's school leaders? and what is interfering with schooling processes?--it includes chapters by a broad range of authors, with expertise on their specific topic. The text is organized in three sections: \*Social and Political Issues; \*Curriculum and Learning Issues; and \*Organization and Management Issues. The goal of this text--designed for school leadership, educational administration, and foundations of education courses--is to challenge readers to think carefully and critically about each of the issues presented, leading to positive action and leadership.

## A PODIATRIST'S GUIDE TO USING RESEARCH

---

*Elsevier Health Sciences* This title is directed primarily towards health care professionals outside of the United States. This title gives practical and jargon-free guidance for practitioners looking to understand, critique and use research to underpin their clinical decision-making. The authors explore the principles and methods used by the active researcher to help consumers of research develop the skills they need to approach and constructively use the extensive data available to consolidate and develop their own practice. With a demystifying and down-to-earth approach throughout, this book examines the mechanics and principles of literature searches and how to formulate appropriate questions to guide searching and extract relevant information; looks at systems of critical appraisal; discusses research methods in a focussed discussion that uses case studies as examples; explores how the resulting enhanced appraisal and understanding can inform changes in practice; and considers the rationale for change and how informed and reasoned change in practice can be measured to monitor outcomes. Integrative approach gives an understanding of research methodology in the context of the requirements of evidence-based practice Practical and jargon-free approach demystifies research Many 'key point' boxes and case studies contribute to ease of understanding Examples from a variety of different health professions Frequent links to contemporary literature

## THE WORLD OF THE WASHINGTON THINK TANKS

---

*Transaction Publishers* Murray Weidenbaum has been a visiting scholar at the American Enterprise Institute and the Center for Strategic and International Studies, a speaker at meetings at the Brookings Institution, the Cato Institute, and the Heritage Foundation and has also written for their publications, and served as a reviewer of ongoing studies. In *The Competition of Ideas*, Weidenbaum examines the political economy of these vital institutions, drawing heavily on several decades of involvement in their activities. He is uniquely able to see their accomplishments as well as their shortcomings. Because of the importance of the activities of their organizations, and their tax-exempt status, think tanks are held to a high standard. Weidenbaum shows that sometimes think tanks are more tank than think—major think tanks are often predictable in the positions they take on public issues and are far better at analyzing the shortcomings of other elements of society than of their own operations. The overarching issue of quality control, Weidenbaum holds, deserves more attention than it has attained in the think tank world. This book presents a careful, balanced account of where think tanks have been and where they are now headed. Given the high levels of professionalism in many think tanks, a fundamental change in the attitude of their management is important. The compelling need is less for the wielder of policy than for the lucid synthesizer of relevant research and analysis. Likewise, society needs sensitivity to the long-term concerns of the citizenry more urgently than rapid response to the opportunities of the moment. Future competition, particularly among the major think tanks, could well be centered, not on achieving greater visibility, but on developing responses to economic, environmental, and national security problems that are likely to be adopted and carried out.

## WORKSHOP ON DISABILITY IN AMERICA

---

---

## A NEW LOOK: SUMMARY AND BACKGROUND PAPERS

---

*National Academies Press* Beginning in late 2004, the IOM began a project to take a new look at disability in America. It will review developments and progress since the publication of the 1991 and 1997 Institute reports. For technical contracting reasons, the new project was split into two phases. During the limited first phase, a committee appointed by IOM planned and convened a 1-day workshop to examine a subset of topics as background for the second phase of project. As was agreed upon with the sponsor of the workshop, the Centers for Disease Control and Prevention (CDC), the topics were: methodological and policy issues related to the conceptualization, definition, measurement, and monitoring of disability and health over time; trends in the amount, types, and causes of disability; disability across the age spectrum and in the context of normal aging; and secondary health conditions. The phase-one workshop was held in Washington, D.C. on August 1, 2005. Its participants included researchers, clinicians, social service professionals, policy experts, and consumer representatives and advocates. The meeting agenda and list of participants are included in Appendix A. Workshop on Disability in America: A New Look- Summary and Background Papers summarizes the workshop presentations and discussions. The background papers prepared for the workshop are included in Appendixes B through O. Some papers were submitted and circulated in advance of the meeting, whereas others were first presented at the meeting. The analyses, definitions, and views presented in the papers are those of the paper authors and are not necessarily those of the IOM committee. Likewise, the discussion summary is limited to the views of the workshop participants.
