### Twelve Months Make a Year

**Purple House Press Lydia was quiet and full of imagination, Jean was adventurous yet bossy, but together with their baby brother Mark, Father, and Cousin Mary, they made just the right sort of family. They loved doing things together, and in these stories that run through all the months of the year, they have old-fashioned fun together in New England during the 1940s. On a wintry day in January, they share ice cream cones in a snow cave dug out by Father. February brings a sleigh ride-accompanied by the magical sound of jingling bells, they drive to the country as twilight descends, filling the air with hushed wonder. When Father buys a red second-hand car, which the children name the Dragon, they are off on more day trips and adventures. In spring they help a farmer with sugaring-collecting sap from maple trees as the Iroquois did, and on Easter morning this close family watches the sunrise over Nantasket beach. So on through the seasons, til it is winter again and they spend Christmas in a cottage by**

the sea. Includes new maps of 1940s Hingham, Massachusetts and the surrounding areas so you can see where Jean and Lydia's adventures take them. Illustrated by Marguerite Davis.

## The Twelve Months of the Year in 850 Languages and Dialects

**Blurb** You've been kidnapped and spirited out of your home country by night across a dozen time zones. Next thing you know, you're crouching

inside a bamboo cage on the outskirts of a thatch-roofed village, murmuring with activity, tucked somewhere into the darkest primeval recesses of some tropical island. There's incense. As you nurse your zip tie bruises, your first thought might be, "Hey, what month is it right now in whatever native language they speak here?" Or maybe your ten thousandth, after wondering what ever did happen to Amelia Earhart or Michael Rockefeller. In either case, you'll be ready now. Here are the sets of calendar months for 850 languages and dialects, complete with profiles of each. This is the database feeding "Today's date in 850 languages" at my website. There, you only get to see one month at a time. Here, all twelve. Most of these languages are still living, some just barely, while several dozen are certifiably extinct. It's a pretty safe bet a compilation like this exists nowhere else. I'm favoring languages that lie at least a bit off the beaten track, offer Gregorian calendar terms departing substantially from our modern neo-Latin, or both. Italian, German, French? You're not here for those. Instead, let's shoot for the Monégasque Ligurian, the Luxembourgish, and maybe the Vivaro-Alpine flavor of Occitan also heard in those respective regions. Of course, you'll likely spot languages far more familiar to you. Many of these entries will feature archaic or less-known terms or scripts, though, so you might find yourself looking at them in a new way.

## The House of Months and Years

**Simon and Schuster** A girl must stop the Boogeyman living in her home from stealing her family's warmest memories in this haunting, atmospheric novel from the author of *Flights* and *Chimes* and *Mysterious Times* and *The Accidental Afterlife of Thomas Marsden*. When her distant aunt and uncle die, Amelia Howling is forced to move into their home when they leave her parents in charge of their children. Her parents assure her that it will be like having a grand adventure with three new siblings, but Amelia is not convinced. Luckily, the house is large, filled with nooks and crannies perfect for hiding from her cousins. But even with all the nooks and crannies, the rumbling and crumbling rooms are more sinister than they seem. The house was built years ago by a creature named Horatio, and he's been waiting for the perfect human inhabitant: Amelia. Horatio has the power to travel through time and memories, and lures Amelia into his world. The memories of children, he told her, were the best, and Amelia agreed—her cousins were full of good memories. Until she noticed that once she and Horatio visited a memory, it was gone forever. And she had been stealing the good memories of her cousins and their parents without even noticing! Horrified and scared, Amelia lets her cousins in on her secret, and asks them for help. Together, they must race through time to recover their minds and break the perfect clockwork of the evil Calendar House.

## Criminology

**"This volume is intentionally far from representing an attempt at exhaustive discussion, or even complete cataloging, of the data of criminology. The book differs from others in the general field in that it is, from first to last, an attempt at a psychologic approach. But it does not emphasize criminal-personality characteristics that were "before the world was." On the other hand the author believes that this personality is at least as much a product of social contacts as is the professional disposition of the physician, e.g. The acquired attitudes, he believes, are probably the greatest sources of our behavior whether it be making professional visits upon the sick or robbing banks. These attitudes develop out of infinitely numerous reactions to our environment; reactions that are facilitated or retarded by reason of our native capacities, our prepotent reflexes, etc. Whatever agencies are set up, therefore, for dealing with the criminal must**

be examined as to their merits by reference to their suitability for developing appropriate attitudes among criminals and all others who come into contact with these agencies"--Préface. (PsycINFO Database Record (c) 2014 APA, all rights reserved).

## Principles and Applications of Hydrochemistry

Springer Science & Business Media The International Hydrological Decade (which ended in 1975) led to a revival of hydrological sciences to a degree which, seen in retrospect, is quite spectacular. This research programme had strong government support, no doubt due to an increased awareness of the role of water for prosperous development. Since water quality is an essential ingredient in almost all water use, there was also a considerable interest in hydrochemistry during the Decade. As many concepts in classical hydrology had to be revised during and after the Decade there was also a need for revising hydrochemistry to align it with modern hydrology. A considerable input of fresh knowledge was also made in the recent past by chemists, particularly geochemists, invaluable for understanding the processes of mineralization of natural waters. With all this in mind it seems natural to try to assemble all the present knowledge of hydrochemistry into a book and integrate it with modern hydrology as

far as possible, emphasizing the dynamic features of dissolved substances in natural waters. Considering the role of water in nature for transfer of substances, this integration is essential for proper understanding of processes in all related earth sciences. The arrangement of subjects in the book is as follows. After a short introductory chapter comes a chapter on elementary chemical principles of particular use in hydrochemistry.
